

# EASY LANGUAGES

## *Volunteering*

Do you want to use a language on the field while getting involved in a social project? Work as a volunteer for important causes all over the world.

Our local partners will introduce you to the different programmes: **social, educational, environmental, or construction and renovation**. Combining volunteering with tourist visits is also possible. These experiences ideally combine **linguistic and cultural immersion**. This way you will not just be a tourist in a foreign country but you will have a positive impact on local communities.
