Programme

CERAN Quality

Since 1975, CERAN has offered top-quality, tailored immersive language programmes to young learners worldwide. Its intensive language programme uses its unique teaching methods to teach students to communicate with confidence. CERAN’s teachers are all experienced, qualified native speakers specially trained to help students progress quickly and reach their language goals.

So that all language aspects are covered, CERAN offers different 45-minute modules which are included in all of the course options. These are:

- **General Dutch**: students learn to communicate in general day-to-day Dutch through lessons based on their language level.
Phonetics: students learn to pronounce words correctly and how to express themselves using ‘SpeedLingua’ software that amplifies sounds, as well as specific techniques for speaking.

- **Multimedia sessions**: an original way to focus on any gaps that students need to work on. These sessions, supervised by a teacher, are particularly apt for work on spoken comprehension and vocabulary.

- **Personalised learning workshops**: depending on your "learner profile", your teachers will help you better understand how to make the most of your learning style.

The training is completed with practice sessions outside of lessons, when your teachers encourage students to speak Dutch and are there to help and correct you.

- **Lunchtime meals**: themed conversations
- **Breaks**: discussions in your target language
- **Themed evenings**: for 2 hours every evening students participate in activities such as intercultural communication, presentations, team management etc.
